

Dr. Gulinson is the first and *only* physician in Phoenix and Glendale who has trained at the LVRIA (Laser Vaginal Rejuvenation Institute of America).

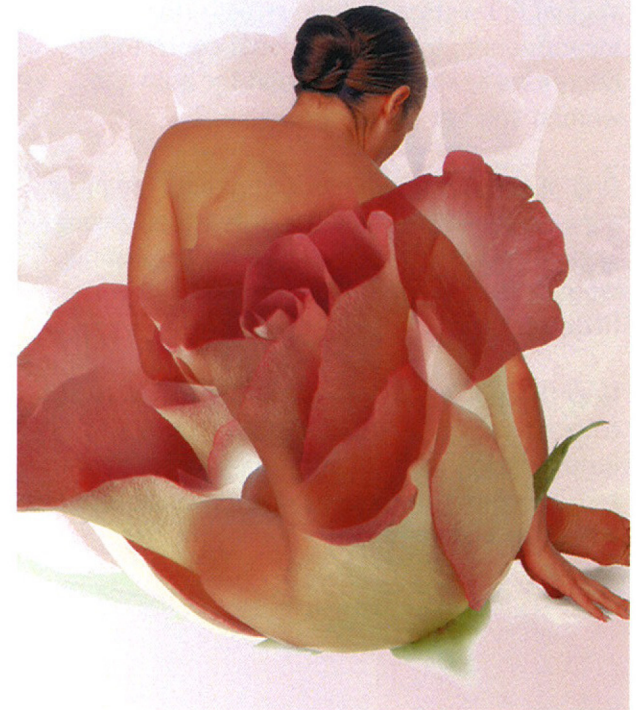

He is board certified in Obstetrics and Gynecology and has practiced here in Arizona for the last 10 years. He was voted Banner Hospital Systems "Top Doc" for the last 4 years. He is a member of the American Society of Cosmetic Surgeons and a fellow of the American College of Obstetricians and Gynecologists.

It is our mission here at The Laser Vaginal Rejuvenation Institute of Phoenix to empower women with knowledge, choice and alternatives.

Laser Vaginal Rejuvenation Institute of Phoenix

Sexual wellbeing is important to a happy, well balanced life. In addition to physical pleasure, sex strengthens emotional bonds between partners, and adds excitement to life.

As a woman's body experiences child bearing and natural aging processes, the muscles and ligaments surrounding her vagina can become damaged or weakened resulting in a condition known as vaginal relaxation. Symptoms of Vaginal Relaxation include stress urinary incontinence, loss of functional control and decreased sexual gratification for both the woman and her partner.

One of the most common complaints I hear as a gynecologist from my patients experiencing vaginal relaxation is that "sex isn't the same." Women say they feel "loose" and have very little sensation.

Now there is a safe, quick, and effective way to treat vaginal relaxation, Laser Vaginal Rejuvenation (LVR) is an outpatient surgical procedure that restores vaginal muscle tone, strength, and control.

Designer Laser Vaginoplasty

Many women are dissatisfied with the aesthetic appearance of their genitalia. Irregular genital structures can be the result of hereditary characteristics, childbirth, trauma, and aging. Dr. Gulinson is trained in techniques of Designer Laser Vaginoplasty (DLV).

DLV is a group of cosmetic laser procedures which repairs, enhances, and beautifies the genitalia. The most common DLV procedures are Laser Reduction Labioplasty (reduction of the labia minora), Laser Perineoplasty to rebuild an aging or damaged perineum and Laser Hymenoplasty (reconstruction of the hymen).

The G-Shot is a revolutionary scientific breakthrough that enhances and enlarges the G-Spot. This is a safe, drug-free, fast, painless and effective procedure which takes less than 30 minutes in the office. The G-Shot will enlarge the G-Spot so it is easier to locate and will enhance sexual arousal and gratification.

Only physicians trained at the Laser Vaginal Rejuvenation Institute of America are certified to perform LVR and DLV procedures. Dr. Gulinson is a certified Associate of the Laser Vaginal Rejuvenation Institute of America and has been trained to perform Laser Vaginal Rejuvenation. He will be happy to discuss your treatment options as well as the risks and benefits of this innovative procedure.

What Women Say About LVR and DLV

"Sex has always been such an important aspect of my life. I had three VERY large babies. I had problems with my bladder and I felt way too loose in my vagina. I felt very unhappy and sexually inadequate. I wanted to be as good as before. I now feel like a real woman again. It is a procedure that is much needed and now we women have a choice."
-P.M.

"I have been very self-conscious about the appearance of my genitalia. Not only did it bother me how it looked, but it also caused problems with my sex life and cleanliness during my menstrual cycles. The size of my labia even made annual exams painful at times by causing pinching with the instruments involved. I was not aware of the new procedures for labial reduction until Dr. Gulinson gave me information. His staff was extremely kind and helpful throughout the process. I was able to see before and after pictures and was given a thorough explanation of the procedure. The procedure itself was relatively short and I was able to return to the comfort of my own bed the same day. I am very happy with the work that Dr. Gulinson performed and feel much better about my appearance. I would definitely recommend this procedure and Dr. Gulinson to anyone interested in changing the way they look and feel about their genitalia."
